

*Casting into the future*

## Product Bulletin - Model # EG-140 Trailer

**Trailer** - another revolutionary lure developed by Strike Pro which incorporates scent attractants.

Scent can be added to the “Internal Scent Chamber” (ISC). It is located under the gill of the lure, which can be removed from the lure body to fill with **STRIKE PRO SCENT COOKIE**.

**STRIKE PRO SCENT COOKIE** will slowly dissolve after contact with water; therefore, as the lure is retrieved, a scent trail will attract predators to take the lure aggressively. Great lure action plus scent attractant provides irresistible temptation to predators ~!!!!

- Remove the ISC from under the gill of lure with tool provided or with fingers carefully.
- Fill ISC (Internal Scent Chamber) with **STRIKE PRO SCENT COOKIE**. Then replace ISC firmly and squarely back into the lure.
- As the lure is retrieved, a scent trail or bait trail will attract predators to take the lure aggressively.

Patent No. 20003641.2
